PetroWorth Updates Operations in Prince Edward Island and New Brunswick

CALGARY, ALBERTA--(Marketwire - Dec. 12, 2007) - PetroWorth Resources Inc. (CNO:PTWR) (FRANKFURT:T3F) announced today that well stimulation (fracking) and testing operations are scheduled to commence later this week at the New Harmony #1 well in Prince Edward Island. The first stage of the operation involves the fracking of one zone (Sand 8, comprised of 27 metres of potential net gas pay), with a second zone planned to be fracked in early January 2008, schedule permitting. Initial test results are expected to be available by the end of January 2008. The completion work at New Harmony is being conducted by Corridor Resources Inc. as part of a farm-in on PetroWorth's PEI Exploration License 03-02.

PetroWorth also announced that it has retained the services of W.G. Shaw & Associates to compile geological and geophysical information on the area surrounding the natural gas discovery at the PetroWorth West Stoney Creek E-08 (Feenan #2) well in New Brunswick. This work will assist the company in determining the next steps required to delineate the extent and size of the discovery, which was announced on December 3, 2007.

PetroWorth Resources Inc. is a junior oil and gas exploration company with extensive onshore properties in Eastern Canada. The Company has acquired 100% working interests in almost one million acres in nine separate exploration permits on Prince Edward Island, Nova Scotia and New Brunswick. The strategy of the company is to conduct aggressive exploration drilling programs on these permitted properties, both in-house and through advantageous farm-in arrangements.
